## ABOUT ME

I am a dedicated and results-driven Electrical and Electronics Engineering student with a strong foundation in both theoretical knowledge and hands-on experience. Passionate about technology, I have a keen interest in renewable energy and automation, and I am eager to contribute to innovative solutions in these fields. With strong problem-solving abilities, effective communication skills, and a commitment to continuous learning, I strive to apply my technical expertise to real-world challenges and advance in the engineering field.

## EDUCATION

## PROJECTS

### Eco-friendly vegetable cart with integrated solar energy source

Developed a sustainable, energy-efficient vegetable cart powered by solar energy to meet the needs of street vendors. The cart features a solar PV array with an MPPT algorithm for maximum energy harvesting, a BLDC motor for efficient mobility, and a detachable solar panel for added flexibility. An evaporative cooling system has been integrated to extend the shelf life of vegetables

### Automatic Medicine Vending Machine

Due to aging the memory power of the old age people will be reducing and due to which they will not be able to know what medicines to be taken at the correct time To overcome this problem, we are herewith a solution called Automatic Vending Machine.

## SKILLS

|                                 |                |                   |
|---------------------------------|----------------|-------------------|
| Basic of Pcb design using KiCad | Plc automation | Basic of simulink |
| Basic of C and Python           |                |                   |

## CERTIFICATION

**Electric Vehicle Technology**  
Tvs Training and Service LTD

**PCB design workshop**  
I-Robochakra

## EXPERIENCE

### Internship

**Sri V.M.A Enterprises**  
📅 11.01.2024-20.1.2024    📍 mettur,india

- Learned how to Operate and maintain the 210 MW Generator.
- Learned how to Operate and maintain the 250 MVA Power Transformer.
- Monitoring the power generation monitoring system interface.

### Internship

**SE CONSULTANCY**  
📅 27.05.2024-06.6.2024    📍 Coimbatore, India

- Assisting in the packing of panel boards for both low tension (LT) and high tension (HT) users:This helps prepare the panels for proper functionality and safe delivery.
- Learning to make wiring connections within the panel boards to ensure proper functionality: I am learning to make precise wiring connections within panel boards, following schematics for accuracy.

### Solar vegetable cart

**Kumaraguru College of Technology**  
📅 Present

- Assisting in system design and hardware implementation
- Built hardware, integrated system components, and tested functionality, ensuring seamless operation under real-world conditions

### Internship

**Vinotha Fabrics**  
📅 12.07.2023-17.7.2023    📍 komarapalayam

- I had experience working with different types of electrical equipment
- gained knowledge on motors

## HOBBIES

Stock market analysis

Circuit Debugging or Repairing

Content creator on x(twitter)

## STRENGTHS

Time management

Leadership

Adaptable and Resilient
