## Profile

Experienced AI Engineer with a strong foundation in generative AI and large-scale system development. As the founding AI engineer for a startup, I spearheaded the development of a hyper-local e-commerce chatbot, managing the entire lifecycle from design to deployment. This included integrating advanced AI technologies such as Large Language Models, semantic search, speech-to-text, and vision models, resulting in a highly engaging and accessible platform. With a deep background in fine-tuning LLMs, prompt engineering, and multi-modal AI systems, I excel at creating innovative, end-to-end solutions that drive both operational efficiency and user satisfaction.

## Areas of Expertise

Machine Learning - Deep Learning - Generative AI - NLP - LangChain - TensorFlow - Docker - LLM - Data Analytics - Python - SQL - OpenCV - Keras - Fast API- Computer Vision - Neural Networks - Data Science – meta platform

## Professional Experience

**Founding AI Engineer, ([paddyproventures.com](#))**

**v Chennai 06/2024 present**

- Developed a hyper-local e-commerce chatbot capable of handling text, audio, and image inputs, significantly enhancing customer experience and engagement.
- Integrated advanced AI technologies, including semantic search, reranking algorithm, diverse Large Language Models, various speech-to-text models, and vision models to deliver a seamless, multimodal user experience.

**AI-ML Engineer, ([Relinns technologies](#))**

**Mohali 01/2024 – 06/2024**

- Developed Retrieval Augmented Generation (RAG) models and conversational AI chatbots leveraging large language models (LLMs) like Chat GPT, Gemini, mistral ect.
- Initiated development of automated AI agents using LLMs for various tasks.
- Proficient in prompt engineering and fine-tuning LLMs, both open-source and closed-source, for diverse applications to enhance accuracy for our specific use case.
- Engineered automatic document ingestion and indexing system to rapidly create domain-specific chatbots with extensive knowledge capabilities.

**Machine Learning Intern, ([AgentInsights](#))**

**Nehru Place, Delhi 10/2023 - 01/2024**

- Deployed open source LLM(Llama 2 7B) in cloud.
- Worked with OpenAI whisper ai and audio data, analyzed it and extracted insight from it.
- Implemented speaker diarization- differentiated different speakers in an audio.

**Deep Learning(NLP) Intern, ([AI4SEE pvt](#))**

**Bangalore, Karnataka 04/2023 - 09/2023**

- Worked with pre-trained transformer based models eg: BERT
- Expertised in transfer learning
- Fine tuned BERT for NER task.

## Education

**Masters in Computer Science (Data Science), ([Central University Of Rajasthan](#))**

**Jaipur 11/2021 - 09/2023**

**BSc Computer Science ([Calicut University](#))**

**Areekode, kerala 05/2017 - 03/2020**

## Projects

### Generative AI projects

- Hyper local E-Commerce Chatbot, support - text, Audio, and Image inputs. [whatsappbot](#)
- Experience working with [BotPenguin](#), an AI chatbot platform
- RAG based Ai chatbots [Link](#)
- Advanced fully automated AI agents using LangChain [Link](#)
- Fine Tuning LLM
