

EDUCATION

- Bachelor of Engineering (B.E) in Computer Science Engineering
Government Engineering College, Talakal, Karnataka, India
Graduated: 2024
Aggregate/CGPA: Above 7.5
University: Visvesvaraya Technological University

EXPERIENCE

- ❖ Completed a **2-month internship as a Software Developer at Bosch Rexroth India** in Bengaluru, Karnataka, India.
Proficient in dissecting user and business needs to architect effective software solutions. Skilled in selecting appropriate technologies and ensuring code quality with expertise in **Python programming** and software development best practices.
- ❖ Completed **Azure Cloud Computing internship** remotely at **Verzeo** in Bengaluru, India, from May 2022.
 - Created Azure storage accounts and Blob storage containers.
 - Configured Windows virtual machines in sandbox environment.
 - Managed passwords using Azure Key Vault
 - Developed a simple chatbot using Azure QnA Maker service.
 - Implemented computer vision resource for OCR.
- ❖ **Cloud Computing Intern* :-**
Whizlabs Software Pvt Ltd (Remote) - Bengaluru, Karnataka, India June 2024
 - -Worked on various cloud technologies under team guidance.
 - Exceeded performance expectations and completed tasks on time
 - Demonstrated strong technical skills, self-motivation, punctuality, and enthusiasm.
 - Proactively learned and applied new technologies.

PROJECTS

➤ Art and gallery

Tool: Backend→MySQL, APACHE Frontend→HTML, Software→Visual Studio

- Developed a dynamic platform for cataloging and organizing artworks.
- Facilitated upload and management of art collections for artists and galleries.
- Simplified administrative tasks such as inventory management and sales records.

➤ Desktop simulator computer graphics visualization

Tool: Software->Code blocks

- Created immersive simulations using advanced computer graphics techniques.
- Provided lifelike experiences for training, entertainment, or educational purposes.
- Focused on delivering visually stunning and functionally rich.

➤ Cloud computing minor and major project

Tool: MS Azure

- Major project involved implementing password management in Azure Key Vault, setting up SQL database, and developing a chatbot with OCR capability.
- Minor project included creating Azure storage and blob storage accounts, along with provisioning a Windows virtual machine in sandbox environment. Also worked on project involving **IoT and python**.
- Traffic Congestion Detection And Alerting Ambulance Using IoT

Tool: Arduino, Android Studio, Firebase, Spyder

Implemented IoT-based traffic congestion detection system to monitor road conditions in real-time. Upon congestion detection, alerts are sent to emergency services to dispatch ambulances promptly, ensuring timely response to critical situation.

TECHNICAL SKILLS AND INTERESTS

- Programming Languages: Python, C, C++, Java, Azure Cloud Computing
- Database Management System (DBMS), Computer Graphics and Visualization
- Microsoft Office Suite, Android Development , Artificial Intelligence (AI)
- Software Development, Web Development, IoT, ChatGPT

ACHIEVEMENTS

- ✓ Secured 100 out of 100 on **Proprofs technical quiz** for engineering students.
- ✓ Certified **Verzeo Company Campus Ambassador**.
- ✓ Certificates from **MyGov.in** in government initiatives.
- ✓ Recognized as **Verzeo motivated learner** for completing the Verzeo technical course.
- ✓ Attended **TCS NQT** exam and cleared **with 70%**.

PERSONAL INTERESTS

- Passionate learner with interests in singing and anchoring college quizzes.
- Strong team player with the ability to engage and motivate others.
- Self-motivated and actively participates in challenging activities and external learning programs.
