Summary

Results-driven Developer with 4+ years of experience in designing, developing, and managing complex web applications. Expertise in PHP, Laravel, JavaScript frameworks, and API integration, combined with strong problem-solving skills and a passion for creating scalable and efficient solutions.

Skills

- **Programming Languages:** PHP | JavaScript | HTML | CSS
- **Frameworks:** Laravel | Vue.js | Inertia.js | React.js |SlimPHP
- **Tools & Technologies:** MySQL | Redis | GitHub | Linux
- **Other:** RESTful API services, Frontend & Backend Development

Experience

Sr. Web Developer	Deltablox BV Netherlands.	2023 July - 2024 Aug
- Led the development and maintenance of high-performance web applications using Laravel and Livewire, enhancing user engagement and site functionality. - Streamlined workflows and optimized applications for scalability and speed, contributing to significant improvements in project delivery timelines.		
Web Developer	Freshbits web solutions Rajkot, India	2022 Dec - 2023 Jun
- Engineered robust RESTful APIs in Laravel to power front-end applications, ensuring seamless data integration and user experiences. - Gained proficiency in Redis, Inertia.js, and Vue.js, contributing to a comprehensive tech stack that boosted application performance and maintainability.		
Web Developer (Intern, Employee)	Plutus Technologies Pvt. Ltd Ahmedabad, India	2020 Jan - 2022 Nov
- Developed scalable APIs and learned to design efficient database schemas, setting a strong foundation for future backend development roles. - Expanded skill set with hands-on experience in AngularJS, ReactJS, and CakePHP, enhancing versatility in tech stacks.		

Projects

StudySync & ScheduleSync (Laravel - Livewire, Azure)	
- Created an admin panel and a super-admin panel to manage teachers and students effectively. - Additionally, teachers can invite students to events, which students can view at any time and join events on time. - Executed Microsoft Single Sign-On (SSO) login for all users to provide secure and seamless access. - Included Zermelo settings to facilitate the import of users efficiently.	
Jakel (Laravel, VueJs, InertiaJs, redis)	
- Developed a comprehensive user management system featuring an admin panel and a super-admin panel to efficiently manage various user roles, including Admin, Cashier, Store Manager, and Warehouse Manager. - Developed comprehensive reporting tools to generate detailed reports, including Inventory report, Sales report etc.	

Active TV <i>(Laravel, VueJs, AlpineJs)</i>	
- This project involves the development of a comprehensive music streaming web application that supports multiple user roles, including Admin, User, and Producer. - The platform offers features for music discovery, playlist creation, live show streaming, and role-specific functionalities, with an intuitive UI built using TailwindCSS. - Users can join live music events streamed in real-time. All live shows are viewable within a 24-hour period.	

BidALift <i>(Laravel, API)</i>	
- Developed a comprehensive ride-sharing application with distinct roles and permissions for Admins, Drivers, and Users, each having own rights and functionalities. - Executed a bidding system where users can place bids for rides, and drivers can accept or decline these bids. - Implemented Google and Facebook login integration to provide users with a seamless, secure, and convenient authentication experience. - Integrated features to ensure smooth operations and a seamless user experience, including real-time ride tracking, automated fare calculation, and in-app notifications. - Managed multiple payment options, allowing users to pay with cash or card. Managed split payments through APIs to ensure secure and accurate transactions.	

Clubify <i>(Laravel, ReactJs)</i>	
- Integrated APIs in Laravel with Authentication used in Android and IOS. - Designed an front-end in ReactJs and having some functionality like user create their own app while registration and create clubs and add members.	

Education

M.sc. In Information Technology <i>(9.33)</i>	Atmiya University (AITS) <i>Rajkot, India</i>	<i>2018 Jul - 2020 Apr</i>
B.sc. In Informaion Technology <i>(7.8)</i>	Virani Science. College <i>Rajkot, India</i>	<i>2015 Jul - 2018 Mar</i>

Highlights

- Master's degree in computer science, information technology, or a similar field.
- In-depth knowledge of JavaScript, CSS, HTML, various languages.
- Browser-based debugging and performance test.
- Developing and implementing back-end architecture & UI.
- Previous experience working as a Back-end developer(PHP, Laravel and VueJs).
- Excellent troubleshooting skills & Good project management skills.
