## INTERNSHIPS

|            |                                                                                                                                                                                                                                                                                                       |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| JULY 2024  | <b>MACHINE LEARNING INTERN AT BATTLECHEST GAMES</b> - 3 months <ul style="list-style-type: none"><li>• Developed <b>AI-Driven tools</b> for <b>Staff Management</b> and <b>Virtual Assistance</b>, streamlining team operations and enhancing workflow efficiency.</li></ul>                          |
| SEPT. 2023 | <b>DATA ANALYTICAL INTERN AT BATTLECHEST GAMES</b> - 3 months <ul style="list-style-type: none"><li>• Executed <b>data collection and web scraping</b> from diverse sources, performed data cleaning and <b>integration</b>, and delivered processed datasets to Back End Development Team.</li></ul> |
| JUNE 2023  | <b>PROGRAM DEVELOPER INTERN AT JAZAA</b> - 6 months <ul style="list-style-type: none"><li>• <b>Engineered user interface</b> using Python Tkinter and <b>integrated Face Recognition System</b> using OpenCV, enhancing application functionality and user experience.</li></ul>                      |

## PROJECTS

### JAZAA FACE RECOGNITION

Application that uses computer vision techniques to recognise and verify human faces. This project is designed to be a simple yet effective tool for face detection and recognition, making use of popular libraries such as OpenCV and face\_recognition.

### INSTAGRAM VIDEO SCRAPER

Tool designed to download videos from Instagram. This tool leverages the Instagram public API and web scraping techniques to collect videos from user profiles, hashtags, and locations.

### GOOGLE PLAY STORE SENTIMENT ANALYZER

Tool that allows users to extract reviews from the Google Play Store. This tool scrapes app details and reviews for any application available on the platform and provides a detailed sentiment analysis of the reviews

## SKILLS

**HARD SKILLS:** Python, Computer Vision, Excel, Data Science, SQL, Power BI, EDA, Statistic, AI & ML

**SOFT SKILLS:** Community Building, Problem Solving, Adaptability, Communication, Leadership, Collaboration

## HACKATHON

|            |                                                                                                                                                                                                                                                                                      |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| APRIL 2024 | <b>SUSTAINAVERSE CODEATHON</b><br><b>Crescent Institute of Science and Technology</b> <ul style="list-style-type: none"><li>• Led a Team in developing a Computer Vision application to detect carbon emissions by buildings</li><li>• <b>First Runner up + Cash Prize</b></li></ul> |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## CERTIFICATES AND PARTICIPATIONS

- Sustaina-verse (**First runner up** among 20+ teams) (2024) (Cash prize)
- Robotics AI and IOT, Intel's RAI program. (2023).
- Smart India Hackathon (College level)
