SKILLS

- Azure Kubernetes Service
- Git/GitHub
- Terraform
- Docker
- Linux basics
- Azure Cloud
- Azure Vm, Key vault, App service, Azure container registry, Entra ID.
- Vnet, Network Security Groups(NSGs), Azure Firewalls, VPN Gateway, Application Gateway,
- Powershell Script
- Azure Monitor and resource Alerts

Certifications

- AZ-900 Azure Fundamentals
- AI-900 Azure AI Fundamentals
- SC-900 Security, Compliance and Identity Fundamentals

Awards

Highest Performance in the team

- Received for good work performance in the project.

Spot Award

- Received for good work performance in the project

Education

2020

BE - ECE

Sathyabama Institute of Science and Technology

Karivemula Sanjeeva

Devops / SRE

Dedicated Azure Support Engineer / Cloud Engineer with 3 years of experience in Azure Cloud, implementing CI/CD pipelines and managing cloud-based services. Proactive and Excited to partner with like-minded individuals to achieve goals.

Experience

Oct 2023 - Present

Delphi

Azure Support Engineer / Azure Administrator

- Proactive Monitoring of Azure Infra using ITSM tools integrated with alerts of resources in Azure.
- Troubleshooting of issues in production services, Providing RCA and next steps to mitigate the same in future.
- Achieve SLA of the tickets created in the ITSM tools based on the severity of the issue.
- Worked on Creating alerts for resources like App gateway, VPN Gateway, Log analytics Workspace, Kubernetes, Virtual Machines and Vm Scale Sets, App Services and App Service plan, Virtual Networks, Front Door, Load Balancer, MYSQL Flexible Server for proactive monitoring purpose.
- Achieved Minimal disruptions to the infrastructure resources after following standard alert framework for azure resources.
- Managing and Troubleshooting of Kubernetes issues raised in the production applications.
- Have Strong understanding on Kubernetes architecture and experienced in troubleshooting Kubernetes issues.
- I ensured that infrastructure is stable to achieve 24/7 availability of applications deployed using azure resources like App services, Kubernetes and MYSQL Flexible server as DB server.
- Performed daily health check for resources to find and troubleshoot any issues in production services in Azure.
- Worked with L2 and L3 by escalating the tickets that require discussion with customer or Microsoft Engineer.
- Mainly worked in monitoring and troubleshooting various resources like App services, Virtual Machines, Load Balancer, Kubernetes cluster, Key vault, MySQL flexible server, App service Plans, Front Door&CDN profiles.
- I can handle tickets using ticketing tools like BMC, Fresh Desk and ensure SLA in resolving the issues raised as per the severity.
- Worked on Azure AD for registering users, groups and dynamically adding users to the DL at the time of creation.
- Worked with windows Machine for installing Antivirus software, checking network connectivity between the targets.
- Worked on creating and configuration of cron job in Linux machine to automate the cleaning of unused and old docker images.
- worked with KQL queries to create dashboards for monitoring and report generation purpose

May 2021 - Mar2023

EY | Bangalore

Devops/Cloud Security Engineer

- Worked on creating the landingzone infrastructure in Azure using Terraform Scripts.
- Used modules and root structure to write the resources for Azure with the help of terraform scripts.
- Used Azure Devops pipelines, Git and Github, Visual Studio code to deploy the Landing Zone infra in Azure cloud.
- Mainly worked with VPN Gateway, Azure Firewalls and Firewall rules, Vnets, Subnets, Application Gateway and deployed using Terraform scripts.
- Assigned Azure policies at Management Group level using terraform for various resources for compliance checking purpose.
- Automated the build process using Jenkins, establishing a streamlined CI/CD pipeline for continuous build and deployment.
- Maintained terraform state file in a storage account for the team to work collaboratively.
- Integrated SonarQube for static code analysis into Jenkins for automatic testing and quality checks, ensuring code quality and adherence to best practices.
- Created Docker files, built, and pushed images to the Docker private registry, and containerized applications using Docker
- Collaborates with Operations, Development, and QA functions to build, monitor, update, maintain, and operate our systems.
- Uses industry standard tools to improve and speed up delivery of our products and services.
- Troubleshoots and resolves issues in our development, testing, and production environments.
- Experience with scripting in Bash, PowerShell, Python, Groovy
- Experience with leveraging JSON, YAML for configuration
- Experience with git for version control, source code control and git branching for efficient deploying and delivery of application to production stage.
- kubernetes monitoring with the help of grafana and Prometheus.
- Orchestrated containerized applications using Docker and managed container clusters with Kubernetes, achieving high availability and scalability.
- Worked with Azure DevOps board for creating Tasks, Bugs and Assigning to relevant developers.
