Summary

Highly skilled Software Engineer (**Android Developer**) with 3+ years of experience in developing applications. Expertise in Java, Kotlin, and C++ languages. Strong understanding of Android Application Development.

Technical Skills

Languages: Java, Kotlin, Python, C/C++,XML , Scripting (Bash), LaTeX, HTML

Technologies: Android SDK, **Jetpack Compose**, Proguard, GitLab, Jira, NDK, Dagger/Hilt, **MVVM**, **MVI**, MVP, Data/view Binding, **coroutine**, ViewModel, **clean architecture**, Event bus, **Unit testing (Mockito, mockk)**, **Work Manager**, Glide.

Concepts: Android Development LifeCycle, **Activity**, Fragments, **Launch Modes**, Memory Leaks, Garbage Collector, **Push Notification**, Product flavors, **Room Database** , Cache, Deeplinks, Route, **NavGraph**, **Gradle**, Agile Methodology.

Experience

Deutsche Telekom (App Integration) (R&D)

Sep 2023 - Present

Software Engineer

Gurugram, Haryana

- Implemented functionality to **Restart the router** gateway by calling a **restart API** for both local and **remote connectivity(RGA)** scenarios, ensuring seamless operation of the network infrastructure.
- Worked on **OTP verification** using Jetpack Compose and MVI architecture, with **country code** selection. Ensured real-time OTP validation, robust error handling, and **efficient state management**, enhancing user experience.
- Integrated **User details API** to fetch menu details and **additional menu** items using MVI architecture and **Kotlin**, enhancing the functionality of the application.
- Integrated **InstaBug** into the core module of the application to gather **analytics events**, enabling a better understanding of user experiences and facilitating improvements.
- Implemented a **Customer support screen** in the main Android application, following the **MVI architecture**, providing users with an intuitive interface to seek assistance and support.
- Developed authentication processes for **LOA (Level of Authentication)** users, ensuring robust security measures and seamless **access control** within the system, enhancing overall user experience.

Snapdeal (E-Commerce)—AceVector Group

July 2021 – July 2023

Software Engineer

Gurugram, Haryana

- Revamped the **Spin and Earn** feature on multiple **Fragments**, resulting in a **2% increase** in user engagement using **MVVM architecture** and kotlin.
- Integrated the **Refund Voucher API** into the main application as part of the user account profile page revamp. This integration provided users with additional functionality related to refunds and vouchers.
- Implemented **ViewPager** in the Zoom Image gallery, integrating an Image Indicator to enrich user experience, ensuring **seamless navigation** for end users.
- Redesigned the **Review And Rating** section on several pages using the **kotlin** language and the MVVM architecture.
- Integrate the **Refund Voucher API** into the main application as a part of the user account profile page revamp.
- Making the Volley Network Request(API) to get the **Widget Structure** and setting the widget on the Fragments according to the key passed by **CXE Engine**.

Education

Motilal Nehru National Institute of Technology, Allahabad

July 2017 - July 2021

Bachelor of Technology in Computer Science and Engineering(CPI: 7.04 / 10.00)

Allahabad, Uttar Pradesh

- Relevant Coursework:** Data Structures and Algorithms, OOPs, Database(DBMS), C++, C, Operating Systems, Java

Projects

Family Where | Room-Database — Android Studio — Java — REST APIs.

- A Deep **Learning-based solution** written in Java for finding lost children and people.
- With this application the one who has lost one needs to **upload a photo** of the lost one along with contact information.
- On the other hand if anyone finds any lost children similarly they will upload a photo of the found one. This application will scan the **data lake** and if there are any matches it will give the result.
