

SHALINI R

📞 +91 7550266172 ✉ saishalu0127@gmail.com 💻 www.linkedin.com/in/shalini-ragupathi 🏠 Chengalpattu, Tamil Nadu

Objective

To build a career through challenging and rewarding assignments and to be a part of an organization where my knowledge, hard work, capacity, innovative and creative thinking can help the company's growth and my growth.

Education

SRM Institute of Science and Technology, Chengalpattu <i>M.SC Applied Data Science</i>	2022 - 2024 8.5/10 CGPA
Vidhya sagar women's college, Chengalpattu <i>B.SC Mathematics</i>	2019 - 2022 8.3/10 CGPA
St. Joseph Matric Hr Sec School Maraimalai Nagar, Chengalpattu <i>Bio Maths</i>	2018 - 2019 53.5/100 Percent
St. Joseph Matric Hr Sec School Maraimalai Nagar, Chengalpattu <i>General</i>	2016 - 2017 87.6/100 Percent

Skills

Technical Skills: Python, Data Analysis, SQL, MS office((Excel, Power Point, Word, Teams and One Drive)

Soft Skills: Communication Skills, Teamwork, Adaptability, Decision Making, Problem Solving

Projects

Detection of Network Attacks Based On Machine Learning Alorithms · The network attacks, including Distributed Denial of service (DDos)and other forms of malicious activities, poses significant challenges to the security of online systems. · Implemented in Python, leveraging Machine Learning libraries, Html, css. · This project aims to review existing research in this domain, shedding light on methodologies, findings and future prospects for combating network based threats.	Jan 2024 - Present
To predict weather parameter monitoring system with live feed on the cloud iot · to predict the current air quality, temperature quality, humidity quality. · Built using Arduino nano, ESP8266Node MCU, DHT11, MQ135 Air Quality Sensor. · A weather parameter monitoring system with live feed on the cloud offers several benefits, including real-time data collection, analysis, and accessibility. By integrating sensors and cloud technology, it enables accurate monitoring of weather conditions. This system enhances early warning capabilities for severe weather events, aids in agricultural planning, and supports climate research. Furthermore, the live feed on the cloud ensures data accessibility from anywhere, facilitating informed decision-making. Overall, this technology promotes safety, efficiency, and informed planning in various sectors, making it a valuable asset in our interconnected world.	Nov 2023-Dec 2023

Experience

Internship (Global Techno Solutions) <i>Role - Machine learning intern</i>	May 2023 – June 2023 <i>Onsite</i>
Hands on involvement in Data Prepossessing, Feature Engineering, Implementing ML model, Hyper parameter tuning (grid search) skills- Machine Learning Algorithms(Linear Regression, Logistic Regression, Random Forest, KNN) Worked Experience:(Global Logic) Role - Associate Analyst April 2024 - September 2024 onsite Global Logic-A Hitachi Group Company Chennai * Worked on AWS Architecture for Generating Image Descriptions using Amazon Recognition and Amazon Bedrock. * Amazon Recognition to detect labels and concepts within images, and then providing these labels into Amazon Bedrock, we were able to produce relevant captions and paragraphs describing the images.
