## EDUCATION

| University or School      | Course Name                           | Date of Attending | CGPA           |
|---------------------------|---------------------------------------|-------------------|----------------|
| Neerja Modi School        | 12th standard                         | 2020 - 2021       | 92             |
| Manipal University Jaipur | B.Tech Computer Science & Engineering | 2021 - 2025       | 9.05 (current) |

## EXPERIENCE

### Machine Learning Intern

Bambhari

- ◆ Developed and implemented machine learning models to enhance the company's data analysis capabilities. Collaborated with data scientists and engineers to collect, preprocess, and analyze large datasets.
- ◆ Built predictive models using algorithms such as linear regression, decision trees, and neural networks.
- ◆ Assisted in the design and implementation of computer network infrastructure for the company's internal and client projects. Documented processes, model architecture, and performance metrics for future reference and reproducibility.

## PROJECTS

### MUJHIREX

Open AI,MySQL,NodeJS,CSS,HTML,REACT,Python

- ◆ Developed MUJHIREX, a job web portal catering to student needs. Achieved great response from our mentor and will be implemented as a new portal for students to get info about jobs and internships from college with a great ease.
- ◆ Enhanced the student experience by offering study resources, educational road-maps, Internships corresponding to his/her preferred field and proper guidance for creating a great resume.
- ◆ Demonstrated strong technical and project management skills while creating a user centric platform to meet the diverse needs of the students and faculty at campus.

### Detecting Phishing websites using Deep learning API

Streamlite,Python,PostgreSQL,TensorFlow,scikit-learn

- ◆ Developed and Deployed a Deep Learning API: Created a robust API using deep learning techniques to detect phishing websites, significantly enhancing cybersecurity measures
- ◆ Implemented Model Training and Evaluation: Trained deep learning models on large datasets of phishing and legitimate websites to achieve high accuracy in detection.
- ◆ Recognition and Implementation: Received positive feedback from senior management and security experts, leading to the adoption of the API as a standard tool for phishing detection within the company.

### "Energy Price Prediction Using LSTM"(Paper submitted for Publishing)

LSTM,Python,scikit-Learn,Neural-Networks

- ◆ Developed Advanced LSTM Model: Engineered a Long Short-Term Memory (LSTM) model to accurately predict energy prices, achieving a remarkable prediction accuracy of 94
- ◆ Achieved High Predictive Performance: The LSTM model demonstrated a high level of accuracy in predicting future energy prices, significantly outperforming traditional prediction methods.
- ◆ Recognized for Innovation: Received positive feedback and recognition for the innovative approach to energy price prediction and the potential impact on the energy sector.

## SKILLS

**Frontend** HTML, CSS, JavaScript, React.js

**Developer Tools** Jupyter, , Googlecolab, Pycharm,

**Database** MySQL, SQLite, MongoDB

**Languages** Python, C++ , JavaScript, PHP

**Soft Skills** Communication, Problem Solving, Teamwork

**Coding Profiles** LeetCode(370+Questions), GFG(200+Questions),CodeForces(300+Questions)

## EXTRA-CURRICULAR & ACHIEVEMENTS

- ◆ Winner of the Technical Debate at Bambhari.
- ◆ Mentor/Head at CodeChef Student chapter in college(7 months), empowering 500+ coding enthusiasts on campus .
- ◆ Head of Marketing at IEEE Sensors Council (1 year).
- ◆ Treasurer of Emanate Community(Currently).
- ◆ Participated in Hackx hackathon.
