### CAREER OBJECTIVE

Looking for an innovative and challenging software testing environment where I can develop and utilize my skills and seek opportunities for personal growth, while being productive and profitable for the organization by accepting challenges.

### PROFESSIONAL SUMMARY

- **4+ years** of experience in **Manual testing** and **Automation testing** with Selenium WebDriver.
- Hands on experience in testing Web Based Applications.
- Good Experience in developing the Test Scripts in Automation using **TestNG Annotations**.
- Extensive Experience in **TestNG & Hybrid** framework.
- Extensive Experience in **JavaScript WebdriverIO** framework.
- Knowledge on Reflection, **Page Object model** for Automation Test Scripts.
- Good Experience in converting Manual Test cases into Automation Scripts.
- Extensive Experience in **Core Java**.
- Good experience of **OOPS concepts, Arrays and String** Class in JAVA
- Hands on experience in writing **XPATH, XPATH axes** and **CSS** for Automation.
- Experience in Manual Testing using **Black Box Technique**.
- Good understanding of Software Development Life Cycle (**SDLC**) and Software Test LifeCycle (**STLC**).
- Actively involved in **Agile** Development process.
- Actively involved in writing test cases by applying **Test Case Design Techniques**.
- Actively involved in **Smoke** testing, **Functional** testing, **Integration** testing and **System** testing and **Regression** testing.
- Extensive knowledge on **Defect, Defect Life Cycle & Defect Tracking**.
- Experience in using the HTTP methods like **POST, PUT, GET, DELETE** in **POSTMAN** Tool.
- Having Good knowledge of **Cucumber Framework**
- Able to communicate professionally and attend Daily, weekly, and monthly review meetings.
- Having Good knowledge of **Testrigor** Ui Automation tool

## TECHNICAL SKILL

**Automation Testing Tool** : JavaScript WebdriverIO ,Selenium Web Driver,Postman,Cucumber ,  
TestNG Hybrid Framework,Maven,Git, and Eclipse  
**Defect Tracking Tool** : Jira , Azure devops board  
**Operating Systems** : Windows Family  
**Programming Languages** : Core Java  
**Database** : SQL

## PROFESSIONAL EXPERIENCE

- Altysys Technologies private limited, Bangalore – Dec 2022 to till Date
- Genpact, Bangalore – Nov 2020 to Dec - 2022

## EDUCATIONAL QUALIFICATIONS

B.E. from KLE Collage of Engineering and Technology Chikodi , Affiliated Visvesvaraya Technological University, Belagavi

## PROJECT DETAILS

**Project1** : FDB VelaBridge  
**Client** : FDB (First Data Bank, inc.)  
**Team Size** : 15  
**Environment** : Java script, Selenium web driver, TestNG, JavaScript WebdriverIO, Maven, Azure devops board, Windows XP.

### Description :

VelaBridge stands as a cutting-edge e-prescription application, playing a pivotal role in transforming the conventional landscape of paper prescriptions within EHR providers and pharmacies. Functioning as a digital alternative, it not only replaces traditional methods but goes a step further by securely managing patients' health records. This innovative feature empowers doctors to gain valuable insights into patients' health histories during the prescription process, fostering a more informed and personalized approach to medical care. Furthermore, VelaBridge contributes to heightened prescription accuracy and promotes efficient communication between healthcare providers and pharmacies, ultimately elevating the standard of patient care.

### Responsibilities:

- Responsibilities include creating automation scripts using JavaScript WebdriverIO to the test cases with through automation.
- Creating and maintaining test suites execution of test cases, bug logging and retesting.
- Run automation scripts continuously on pipeline in Azure devops board.
- Created Test plans, and test cases, execute test cases, and test reports, and upload them in the Azure devops board.
- Analyze and create the bugs in the Azure devops board and assigned to the developers.
- Continuous meetings with client for sprint stories

**Project2** : Altos

**Client** : Altos  
**Team size** : 10  
**Environment** : Java, Selenium web driver, TestNG, Maven, JIRA, Windows XP.  
**Description** : Altos is a web-based software for hospital and clinic management it enables you to run the operations smoothly where you can perform actions like Appointment management, Patient registration, Billing, Insurance claim submissions, Patient Reports, Clinical documentation.

**Responsibilities:**

- The major role is to analyze, create and execute the functional test cases using the JIRA tool.
- Created Test plans, test cases, execute test cases, and test reports and upload them in the JIRA tool.
- Written Automated test scripts using Selenium web driver and Java.
- Participating in project review meetings, Scrum meetings, weekly and monthly status meetings

**Declaration:**

I hereby declare that the information furnished above is true to the best of my knowledge.
