

Simon Rajasingh

FULL STACK DEVELOPER

+919677000212 | codexsimon@gmail.com | Coimbatore, Tamilnadu - 628201

PROFESSIONAL SUMMARY

Software engineer with a penchant for problem-solving in Python & passionate about new technologies. Hands-on experience with development of Dynamic web applications using the Django Web framework on Linux & Unix platform. Specialist for designing database schema structure & deploy web apps to the cloud. Ambitious learner for new technologies and proficient in the way I handle the software. I spend a lot of time answering questions on StackOverflow and frequently contributing to open source projects on Github.

TECHNOLOGIES

Front End	CSS3, Bootstrap, Bulma, HTML5, JavaScript, React.js, Polymer.js
Back End	Python, Django, Flask, FastAPI, JavaScript, Node.js
Data Stores	MySQL, PostgreSQL, DynamoDB, Redis,
Web Servers	Apache HTTP Server, Nginx, Kubernetes. AWS
Operating Systems	Linux Red Hat, Ubuntu, Chromium OS, Mac OC, Windows 10, Windows Server

EXPERIENCE

SENIOR SOFTWARE ENGINEER | VueData | Remote - US

May 2023 - Present

Client: Berkshiregreys
Joined the Berkshire Grey project as a key member of the UI/UX team, responsible for managing UI functionality within the HMI and conducting comprehensive PR reviews.

- Lead UI functionality efforts for the HMI system as part of the UI/UX team.
- Designed and implemented new features, including React components styled according to client-provided mockups.
- Developed a new API with gRPC integration to interface with the backend.
- Conducted thorough code reviews and provided constructive feedback on pull requests from fellow developers.
- Authored and maintained test cases to ensure the API met all functional requirements.

Skills: Python, React Js, MongoDB, Kafka

SENIOR SOFTWARE ENGINEER | VueData | Remote - Australia

Aug 2022 - Jan 2023

Client: CorePlan
Started Working on a Core Plan product where I implement major features and bug fixes in the massive Django codebase. Part of the job involves creating the frontend fixes on the React side as well.

- Contributed to the CorePlan product by implementing major features and resolving bugs in a complex Django codebase.
- Enhanced the frontend, including updates to the Django admin interface and addressing React-based frontend issues.
- Delivered on feature requests and efficiently resolved bugs across a large-scale codebase.

Skills: Python, Django, Chalice

SENIOR SOFTWARE ENGINEER | VueData | Remote - USA

Nov 2021 - July 2022

Client: Arch Insurance

Began as a backend developer on the VIKI project, focusing on future feature implementations. Participated in three-week agile sprints, translating issues into code solutions. Managed pull requests and maintained code quality by adhering to language standards.

Developed expertise in implementing authentication and authorization mechanisms, ensuring that users had the appropriate access to resources. Implemented encryption strategies to protect sensitive data both in transit and at rest. Secured APIs by integrating OAuth for third-party authentication, utilizing JWT for token-based authorization, and configuring API gateways to manage and protect API traffic effectively.

Skills: Python, Django, React JS

SOFTWARE ENGINEER | Freelancer | Remote - India

July 2019 - Sep 2021

Started doing projects in upwork and other clients. One of the my major clients are graphistry.com and pressrush.com, dialoggstudio.com

Graphistry:

- Working with team to create a share component for the Graphistry
- Integrate stripe payment into the Graphistry

Pressrush

- Fix security issues in Pressrush
- Converted into docker for easier deployment

Dialoggbox

- Solo developer working on the dialog box project.
- Changed a messy code into a production quality code
- Integrate zoom platform SDK into the dialog studio.

Bookrfaas:

- Create a backend architecture for the Bookrfaas applications.
- Integrated frontend application with API services.
- Deployed the solution to Amazon Web Services.
- Technologies: Python, Django, Bootstrap, Angular, MySQL, Pandas, Plotly, PeriscopeData

PYTHON DEVELOPER | VISTEON | Chennai, India

Sep 2015 – May 2019

Visteon is a leading company in the vehicle industry and thus provides an in-house solution provider for vehicle

manufacturers that provides infotainment and various solutions including Autonomous vehicles.

FOTA:

- Created a software management tool for Over The Air update.
- Integrated application to backend services.
- Deployed the solution to Amazon Elastic Container Service.
- Technologies: Python, Flask, Bootstrap, Redis, MySQL, D3.js, Dropzone.js, Docker, AWS

iBSP:

- Created an internal tool that developers can use to generate a Linux image
- Build and deploy microservices on AWS lambda.
- Configured Buildbot to automate the build setup for iBSP.
- Developed an internal application that has reduced developers' time by 50%.
- Technologies: Yocto, Python, Django, Bootstrap, Polymer.js, PostgreSQL, Nginx

Floornet:

- Created office management application in React Framework.
- Converted floor map to the web interface.
- Technologies: Python, Flask, React.js, Konva.js, PostgreSQL

Protocol

- Created CLI using a new Python framework called Click.
- Developed a tool to analyze the logs generated by the Linux image.
- Created frontend using React.js to show analyzed data to the frontend.
- Experienced in deploying applications to Amazon Web Service.
- Technologies: Python, Click, Django, React.js, Nginx.

WEB DEVELOPER | Tenmiles Technologies | Chennai, India

Feb 2015 - Aug 2015

Tenmiles Happyfox development and improvement. Integration with other platforms and testing automation. Help improves code quality and integration.

- Designed and programmed an application in an agile environment utilizing a test-driven development approach
- Created and maintained project schedule and technical documentation.
- Solve several bugs on the Happyfox ticketing software.
- Provided a solution to the development team which involves new customer problems.
- Built and integrated with Campaign Monitor Rest API service.
- Technologies: Python, Django, PostgreSQL, Javascript, Nginx

WEB DEVELOPER | Raising Ibrows | Chennai, India

Jun 2014 – Feb 2015

Raising Ibrows building and developing an application from scratch and that scales to million users.

- Designed and coded application in an agile environment utilizing a test-driven development approach
- Created and maintained project schedule and technical documentation and acted as liaison between business, QA and development team
- Created an audiotube.com from scratch.
- Created testing methods for development that reduce the error 50%
- Deployed the application to Google App Engine and Google Cloud Instance using Docker
- Technologies: Python, Django, Flask, MySQL, React.js, Google AppEngine, Google Compute Engine, Nginx,

CUSTOMER ENGINEER | HCL Infosystems Ltd | Calicut, Kerala, India

Mar 2012 – Jun 2013

HCL Software installation and automates the process of the bug tracking system.

- Installed and configured wifi portal on the office.
- Experienced with proxy and VPN configuration.
- Installed and Configured printer machine on the client machines
- Worked as a printing machine service engineer.
- Printing machine problem escalation.
- Documentation of the workflow of engineering tasks.
- Helped phone router problems and fixed problems arose on the board including soldering and system configuration.
- Technologies: Windows Server Administration, Installation, Debugging.

EDUCATION

BE | National Engineering College | Chennai, India

2005 – 2009

- *74 % Score in overall academic activities*
- *Completed with First Class degree*

PUBLICATIONS & AWARDS

Medium	2015
Certificate of excellence Visteon / OS-Bsp team	2017
Personal blog	2019

ADDITIONAL ACTIVITIES

Marathon, Dream Runner Half Marathon, Chennai, India	2015
Marathon, Javadhu Hills Ultra Marathon, Vellore, india	2016
