WORK EXPERIENCE

Path Infotech Limited (Programmer)

08/2021 – Present

Noida

Achievements/Tasks

- Led the design and implementation of an **Data pipeline**, reducing data processing time by **25%**.
- Working on a **CRM** (Customer Relationship Management) project developed the **SQL queries, procedures, functions, indexes, triggers** and other database objects according to campaign criteria in Oracle 12c version.
- Built and maintained complex SQL queries, dynamic SQL query for data analysis and also experience in Data Migration tools like SQL loader along with Extraction, Transformation and Load(ETL) tools.
- Migrated On premise **Data Distribution** to **Azure Cloud** Distribution and **Hive Data Warehouse** using **Pyspark** in less than 1 week.
- Effectively developed, and collaborated with others to develop, database-centric solutions within a distributed team of **SQL / PL-SQL, Java team**.
- Involved in **production Support** of existing applications to resolve issues in an efficient manner.
- Created PL/SQL blocks like **tables**, stored procedures, triggers, functions, Oracle materialized views.
- Designed and developed effective app-based solutions by performance tuning and troubleshooting to address the problems and concerns of the organization.
- Reduced redundant activities of 3 departments by Building Data Warehouse, Data modeling and Data Ingestion activities.
- Implemented data quality checks, resulting in a **15%** improvement in data accuracy.
- Conducted performance tuning on **SQL** queries, optimizing data retrieval by **20%**.
- Migrated On premise **Data Distribution** to **Azure Cloud** Distribution and **Hive Data Warehouse** using **Pyspark** in less than 1 week.
- Achieved 100% consistency in a team of 4 members, towards driving POCs on Data workflow in **Azure Data Factory**.
- Strengthened POCs to set up Devops environment using Jira, Azure code deploy on **Databricks** and **ADLS Gen2** environments.
- Achieved proficiency in Azure Data Factory, Databricks, ADLS Gen2, **Delta lake** and other Azure services.
- Designed and Developed UI for Customer Service Modules and Reports using **HTML5, CSS3, JavaScript, jQuery, AJAX, JSP, Servlets, API's**.
- Created a data pipeline to extract data from Oracle and load it into Azure Data Explorer.
- Created Jobs/Schedules** for batch data processing.
- Developed an **End-to-End ETL framework in Azure cloud**.
- Created a data pipeline to extract data from Oracle and load it into Azure Data Explorer.

PROJECTS

Pyspark

- Orchestrated a Finance Domain project, employing **PySpark** and **Azure Cloud**, optimizing lending processes for new banks and achieving 20% reduction in processing time.
- So the situation was that they had a lot of raw data and the client wanted to provide loans to their customers at low risk.
- So they wanted to get the result in descending order with the user ID, name and final loan score. Based on that, they can decide which customer should provide the loan or which loan application should be rejected.
- The complete raw data size was approx 1.7 GB in CSV format and there were approx 100+ columns and 2 million+ records.
- Applied data cleaning techniques, resolving **95%** of duplicates, null values, and data type issues, ensuring data integrity for downstream teams.
- Implemented Slowly Changing Dimensions (**SCD**) strategies, handling updates seamlessly and enhancing data accuracy by 25%.

Excel

- Create an **annual sales report** for 2022, so that the store can understand their marketing strategy and grow more sales in 2023.
- We did data cleaning to remove duplicates and null values and made an Age group column from Age column using IF condition.
- Created Pivot table to summarize the data and create **charts** and **graphs** to solve the business problems.
- We have built a dashboard in excel with slicers so that users can interact with the dashboard and view it in different ways to get results.

Power Bi

- I collaborated with the proprietor of the Madhav Store to create a comprehensive **dashboard** for tracking and analyzing their online sales across India. The dashboard provides informative data and smart visualizations to enhance decision-making and sales strategies.
- Developed a tracking and analysis dashboard for online sales information.

Servitium CRM

- Worked as a full stack developer in the Servitium CRM team.
- We used various technologies like **JSP**, **Struts**, **XML**, **HTML** and **CSS** for front end and backend web development.

ACHIEVEMENTS

Employee of the month (08/2023)

Awarded 1st prize among 250 participants for demonstrated exceptional performance or made a significant impact on a project, team, or client.

Player of the tournament (03/2023)

Awarded with player of the tournament in office cricket team.

Branch topper (08/2018 - 09/2018)

Awarded 1st prize among 180 students for demonstrated exceptional performance in b.tech.

EDUCATION

Meerut Institute of Engineering & Technology (08/2016 - 08/2020)

Bachelor of Technology

CERTIFICATES

Big Data Developer Master Program (11/2021 - 10/2022)

LANGUAGES

English, Hindi

Native or Bilingual Proficiency
