Objective

I am a persistent and results-oriented Engineer dedicated to creating innovative solutions that drive positive change. I am keen, curious and open to adapt new technologies where I can apply my expertise in software development to contribute to impactful projects and enhance user experiences. I would be a good fit in roles which provide challenges where I can collaborate with cross-functional teams and leverage technology to make a meaningful difference in diverse industries

Work Experiences

SOFTWARE ENGINEER

HEALTH CARE TECHNOLOGY INNOVATION CENTRE(HTIC) | MAY 2022- DEC 2023

Designated software engineer in a medical device R &D, worked on bronchoscope and endoscope projects.

Project: Bronchoscope

Job responsibilities:

- Drafted and reviewed SRS, flowchart, and manuals for the developed system.
- Drafted source code documentation using doxygen.
- Worked on script writing, C, C++, QT-creator platform, and SDK- xilinx platform.
- Learned and followed Agile, MISRA C, MISRA C++, and AUTOSAR standards.
- Developed test cases, test strategy plans and documented test results.
- Analyzed software defects and performed manual testing(sanity testing and black box testing) of medical device.
- Utilized JIRA to log and track defect. Generated detail reports and facilitated bug fixing discussions.
- Tasked with debugging of source code files.
- Collaborated closely with cross function teams which includes development, quality assurance and regulatory affairs to ensure compliance with industry standards(IEC62304).

Project: Endoscope- Endoscope used for Gastroscopy, Colonoscopy and Duodenoscopy

Job responsibilities:

- Drafted and reviewed SRS,URS, PRS and manuals for the developed system.
- Worked on script writing, C++,and QT-creator platform.
- Followed Agile practices.

- Developed comprehensive test cases, test strategy plans and documented test results ensure traceability and achieved accurate coverage of verification and validation requirements.
- Analyzed software defects and performed manual testing(sanity testing and black box testing) of medical device.
- Utilized JIRA to log and track defect. Generated detail reports and facilitated bug fixing discussions.
- Collaborated closely with cross function teams which includes development, quality assurance and regulatory affairs to ensure compliance with industry standards(IEC62304)
- Worked on identifying root causes and arriving at solutions by performing CAPA.

Technical Skills

QT | C | C++ | Agile| Python | Linux | JIRA | CONFLUENCE | BITBUCKET | Fusion 360 | MATLAB | SPSS | Latex | Kinovea | Excel |Word | PowerPoint | Labview | Manual testing | VirtualBox | Raspberry pi

Soft Skills

Adaptability | Team Player | Multitasking| Goal-Oriented

Conferences & Publications

- Participated in the 6th International Conference on Intelligent Computing and Control Systems where I presented a paper titled 'Real time motion analysis of middle-aged and aged people'. The paper was published in IEEE Xplore.
- Participated in the 2020 IEEE Bangalore Humanitarian Technology Conference (B-HTC) where I presented a paper titled 'An alternative foot brace for clubfoot correction'. The paper was published in IEEE Xplore.
- Participated in the International Conference on Electronics and Sustainable Communication Systems (ICESCS2020) where I presented a paper titled 'Raspberry pi based wearable reader for visually impaired people with haptic feedback'. The paper was published in IEEE Xplore.

Hospital Training And Internship

- Project Intern- Mation Work| May 2020-Jul 2020
- Intern- CSIR-Central leather research institute gait analysis lab|Jul 2019
- Intern- SSN College of Engineering|Jun 2019
- Hospital Training-Fortis Malar Hospital|Sep 2019
- Hospital Training-Cancer Institute WIA| May 2018

Projects

- ❖ Vein Detection using Matlab.
- ❖ Real time motion analysis of type 2 diabetics
- ❖ Kinematic analysis of throwing events- shot put and discus throw
- ❖ An Alternative Foot-brace For Clubfoot Correction
- ❖ Raspberry Pi Based Wearable Reader for Visually Impaired People with Haptic Feedback

Education

- M.Tech Biomedical Engineering | 2022 | SRM INSTITUTE OF SCIENCE AND TECHNOLOGY | CGPA-9.70
- B. E Biomedical Engineering | 2020 | SSN COLLEGE OF ENGINEERING |CGPA:7.78

Workshops

- Robotics and AI in Healthcare Organized by SRM Department of Biomedical Engineering
- Virtual Industry Interface Program Organized by Siemens Healthineers
- Participated in Kaizen Robotic Program
- National Level Workshop on Brainwave Robotics
- Advanced Workshop on Home security with Raspberry Pi
- Participated in DRDO sponsored international short course on biomechanics
- Attended workshop on Conventional Machine Learning to Deep Learning for Speech, Image and Text Processing organized by IEEE.
