

JAYASRIRAM

Snowflake Developer

CONTACT

- +91 9487174865
- jayasriramduraisamy@gmail.com

SKILLS

- Snowflake DB
- AWS S3
- ETL Concepts
- Oracle SQL
- PL / SQL
- Python

TOOLS

- AWS S3
- IAM
- IICS
- JIRA
- GitHub Desktop

PROFILE SUMMARY

Snowflake Developer with 3.5+ years experience in data warehousing, PL/SQL, and SQL optimization. Skilled in AWS-Snowflake integration and solving complex data challenges, with strong communication and documentation abilities.

WORK EXPERIENCE

INAT Technologies Private Limited

2021 - PRESENT

Snowflake Developer

Current Project

- Domain : BFSI
- Role : Snowflake Developer
- Client : Morgan Stanley
- Environment : Oracle, AWS S3, Snowflake DB

Roles and Responsibilities

- Oversaw the development of scalable data warehouse solutions in Snowflake.
- Designed and refined complex SQL queries for data analysis and business intelligence applications.
- Coordinated a seamless migration of data from Oracle Database to Snowflake, utilizing flat files to optimize application migration processes.
- Created a diverse array of Snowflake objects—including warehouses, schemas, databases, tables, views, pipes, stages, and scaling policies—to support effective data management.
- Demonstrated advanced expertise in loading unstructured data efficiently, leveraging the VARIANT datatype, flattening techniques, Parquet format, and other innovative methods.
- Led the development of Snowflake procedures, functions, and User Defined Table Functions (UDTF) to automate workflows and enhance data manipulation capabilities.
- Implemented external tables to enable seamless access to data from files, particularly beneficial in scenarios with restricted file access in AWS S3.

- English
- Tamil

Previous Project

- Domain : BFSI
- Role : Snowflake Developer
- Client : Deutsche Bank
- Environment : Oracle, AWS S3, Snowflake DB

Roles and Responsibilities

- Led the design and implementation of scalable Snowflake data warehousing solutions, improving data management efficiency.
- Optimized complex SQL queries to enable effective data analysis and support business decisions.
- Managed seamless Oracle-to-Snowflake data migration, streamlining application workflows using flat files.
- Created Snowflake objects like warehouses, schemas, and tables, ensuring strong data governance and scaling policies.
- Executed structured data migrations with precise error handling and transformation techniques for accuracy.
- Efficiently loaded unstructured data using VARIANT datatype, Parquet format, and advanced flattening strategies.
- Developed procedures, functions, and UDTFs to automate workflows and enhance Snowflake data manipulation.
- Implemented external tables for easy access to restricted AWS S3 data storage environments.
- Continuously pursued learning opportunities to stay updated on Snowflake innovations and optimize data strategies.

DECLARATION

I hereby affirm that all the statements provided above are true to the best of my knowledge.

Yours sincerely,
D Jayasriram
