Education

Indian Institute of Information Technology

MSc in AI & Machine Learning; SGPI: 9.22 (First Year)

Lucknow

2023 – 2025

Bipin Bihari Degree College

Bachelor's in Mathematics; Percentage: 75%

Jhansi

2020 – 2023

Sheer Wood College

Class XIIth; Percentage: 92.8%

Jhansi

2020

Experience

Machine Learning Intern at Feynn Lab

July 2024 - Oct 2024

Prototyped AI products, enhanced targeting accuracy by 20%, made financial models, and achieved 95% accuracy in a thyroid disease detection model using deep learning and computer vision.

Research Analyst at Igurur Consultancy Service LLP

June 2024 - July 2024

Developed and improved the accuracy of NLP models for text tagging (NER) and translation in the Hindi language as part of the research and analytics team of 10 members in the ML/AI department.

Data Analyst at Psyliq

Nov 2023 - May 2024

Assigned 5 projects for which applied advanced data analysis tools, including Excel, Power BI, Tableau, R, and SQL, to transform raw data into actionable insights, supporting data-driven decision-making.

Projects

Crypto Agent | Together.AI LLaMA 3.1, Coingecko API, Streamlit

- Created a **Crypto Agent** using the **Together.AI LLaMA 3.1 (8-billion parameters)** via API key, integrating the **Coingecko API** to fetch real-time cryptocurrency prices and details. Build an interactive **Streamlit** UI for a seamless user experience, showcasing API integration and use cases in financial technology.

AskPDF | PDF Analysis, Language Models

- Curated a tool leveraging **language models and advanced data retrieval techniques** to analyze and generate insights from multiple PDF documents(upto 200mb), facilitating comparison and prompt-based responses.
- Implemented a tech stack including **Python, Streamlit, chunking techniques size(10000), Google Generative AI, LangChain, PyPDF2, ChromaDB, and FAISS** for seamless document processing and natural language understanding.

Fine-tuning LLM | Idefics 9B, Hugging Face

- Fine-tuned the multimodal LLM **Idefics 9B** on the Pokémon Go dataset available on Hugging Face using **torch** and **transformers**.
- Have used **torch, datasets(HuggingFaceM4/idefics-9b), peft (LoraConfig and model retrieval), PIL, and transformers (IdeficsForVisionText2Text, AutoProcessor, Trainer, TrainingArguments, BitsAndBytesConfig)** for implementing techniques.

Credit Risk Analysis | XGBoost, Decision Tree, Random Forest

- Utilized the **CIBIL** dataset(51336 rows) to deploy **XGBoost, Decision Tree, and Random Forest algorithms**, enabling robust assessment and mitigation of credit risks with data-driven insights.

Stock Forecast Web App | Streamlit, Prophet, yFinance

- Crafted an interactive web application using **Streamlit, Prophet, and yFinance** for real-time stock price forecasting upto 4 years.

Skills and Coursework

Technologies: Python, Java, SQL, Power BI, MS Excel, Looker, BigQuery, NumPy, Pandas, Matplotlib, Scikit-Learn, Seaborn, OpenCV, TensorFlow, Keras, SpaCy, Docker, AWS, REST APIs, MLOps, Streamlit, MongoDB, PostgreSQL, Selenium, VS Code, Jupyter, Google Colab, Transformers, Git/GitHub, LangChain, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs).

Coursework: Statistics, Linear Algebra, Artificial Intelligence, Data Structures & Algorithms, Machine Learning, Deep Learning, Reinforcement Learning, DBMS, Computer Vision & Image Processing, NLP, Design & Analysis Algorithms, Cloud Computing, Optimization Techniques.

Achievements

- Competitive Exams:** Secured AIR 785 in IIT JAM (2023)
- Certifications:** Completed courses in Data Science from IIT Madras(2022), Optimization Techniques through NPTEL, Machine Learning on Kaggle, and participated in Microsoft's AI Challenge.
- Workshops:** Attended workshops on Web 3.0 and Cloud Computing (IIT Madras Paradox).
- Coding Skills:** Solved 100+ questions on various platforms including HackerRank , LeetCode , and Coding Ninjas .
- Kaggle:** Earned the title of Notebook Expert 2,368 of 61,912 .
