SUMMARY

I'm a Full-Stack Developer with over 9 years of hands-on experience in designing, building, and optimizing secure, scalable web applications. I specialize in Node.js, TypeScript, JavaScript, AWS, and microservices. Throughout my career, I've successfully led high-impact projects, mentored development teams, and driven significant cost-saving initiatives. I'm adept at delivering innovative, user-focused solutions that tackle complex technical challenges and enhance overall system performance. I'm passionate about leveraging cutting-edge technologies to drive organizational growth and efficiency.

EXPERIENCE

Diligent Global

06/2024 – Present

Senior Software Engineer

Hyderabad, India - Remote

- Contributed to the Zeusó project, a tech-driven solution transforming supply chain management for retailers, manufacturers, and distribution companies.
- Developed features for Zeus Command AI, an enterprise platform streamlining sales-to-fulfillment operations, improving efficiency and reducing environmental impact.
- Led the development of a live freight booking and tracking system, providing real-time visibility to over 60 major enterprise customers across 13 countries in Europe.

Doosra

10/2022 – 12/2023

Senior Full-Stack Developer

Hyderabad, India - Remote

- Led development of privacy-enhancing features for Doosra's communication platform, including Virtual Mobile Number management.
- Integrated Chargebee payment gateway for subscription management.
- Mentored 4 junior developers in test-driven development and pair programming practices, improving team productivity by 10%.
- Designed IVR and call routing microservices using NodeJS, Express, SQS, VoIP, React, TypeScript, and JavaScript.

Eli Lilly

05/2020 – 08/2022

Associate Manager - IT

Bengaluru, India

- Built Node.js/ExpressJS microservices to streamline healthcare data management and analysis.
- Created robust data pipeline using Python and Elasticsearch for processing international hospital data.
- Developed analytics API to empower data-driven decision-making for healthcare research.
- Enhanced user authentication and security by implementing OAuth and JWT, securing user data across platforms.
- Participated in agile sprint planning, contributing to a 15% increase in team velocity.

Nagarro

08/2019 – 04/2020

Senior Associate, Technology

Gurugram, India

- Integrated Alpaca and Kraken APIs for stock/crypto trading, using AWS, Lambda, SQS, Node.js, and API Gateway.
- Designed an automated system for handling stock events and financial indicators.
- Initiated a corporate-wide code review practice, improving code quality by 30%.

EVC Ventures

06/2018 – 08/2019

Senior Software Engineer

Gurugram, India

- Managed data interchange between server and users, focusing on server-side logic, central database maintenance, and performance.

Chalk Digital

06/2015 – 06/2018

Software Engineer

New Delhi, India

- Delivered a complete web application, ensuring high performance on mobile and desktop.
- Collaborated with back-end developers to build RESTful APIs and integrate external web services.

PROJECTS

Doosra/Alhooa

- Domain: Telecommunications
- Technologies used: Node.js, Express.js, React, TypeScript, JavaScript, AWS SQS, VoIP
- Led development of Doosra's Virtual Mobile Number platform to enhance user privacy, with features for virtual number management and optimized call functionality.
- Collaborated with AWS to deploy services using SQS and Lambda, ensuring scalable, resilient infrastructure.
- Mentored junior developers, promoting best practices in code quality and test-driven development.

Stock/Crypto Trading Platform Integration

- Client: Fidelity International
- Domain: Fintech and Asset Management
- Technologies used: Node.js, AWS Lambda, SQS, API Gateway, JavaScript
- Integrated Alpaca and Kraken APIs for real-time stock and crypto trading, automating trade executions and monitoring financial indicators.
- Provided technical leadership, ensuring adherence to best practices in API integration and security.

Healthcare Data Analytics Platform

- Domain: Healthcare
- Technologies used: Node.js, Express.js, MongoDB, Elasticsearch, AWS
- Developed a healthcare analytics platform to improve decision-making through real-time data insights, with OAuth and JWT for secure data access.

EDUCATION

Vellore Institute of Technology

Master's in Computer Science

07/2012 – 05/2015

Vellore, India

University of Rajasthan

Bachelor's in Computer Science

07/2009 – 05/2012

Jaipur, India

SKILLS

Node.js, TypeScript, JavaScript, Express.js, MongoDB, Amazon Web Services, Angular, React, Microservices, Git, AWS Lambda, HTML/CSS
