+91 8630399004

Seasoned Software Developer with over 1.5 years of experience in mobile app development. Skilled in using modern development tools and frameworks, with background in integrating APIs, managing state, and creating responsive, user-friendly interfaces.

Work Experience

Jr. Software Developer

Canara HSBC Life Insurance, Gurugram

March 2023 – August 2024

- Contributed to the development of the in-house built customer-facing application “Canara HSBC Life”.
- Worked on various modules including Link family policy, service request (e.g., PAN update, change of contact details, etc.).
- Utilized firebase storage for file uploads and used Firestore database for data storage.
- Integrated REST APIs and employed MVC architecture.
- Managed state using GetX and developed responsive, pixel-perfect widgets based on design wireframes.
- Worked with third party APIs and Firebase cloud.

Projects

Canara HSBC Life App - [Android](#) [iOS](#) [Website](#)

- Developed UI and integrated backend APIs.
- Created modules according to the Functional Requirement Document (FRD).
- Ensured responsive UI across both platforms (Android/iOS).
- Implemented Firebase Cloud functionalities and refresh token features.

InstaServe App - [Android](#) [iOS](#)

- Developed a Flutter Framework app for company salespeople to raise service request for users.
- Implemented service request using OTP verification.
- Search policy feature and showing details of policy from cloud firestore.
- Supported both Android and iOS Platforms.

Internships

Software Developer

Tech Mahindra, Noida

May 2022 – August 2022

- Completed courses and training on Web Development.

Personal Projects

E-Commerce Application

- Developed a full-fledged e-commerce application, handling the complete app from design to development.
- Ensured responsive across both Android and Web platforms.
- Implemented key features such as Product Listings, Store, Wishlist, and User Profile sections etc.
- Integrated User Authentication functionalities, including Login, Signup, Google Sign in using Firebase Authentication.
- Utilized GetX for efficient state management and built pixel-perfect, responsive widgets.
- Leveraged Firestore Database for data storage and Firebase storage for media management.

Skills

- **Flutter framework | MVC Architecture**
- **Dart | OOPS | Firebase Firestore | Firebase Storage**
- **Git | GitHub | BitBucket | Postman**
- **Mobile Application Development | Application Debugging | Optimization**

Education

B.Tech CS/IT (MIET, Meerut)

July 2018 – August 2022
