WORK EXPERIENCE

Wipro | ReactJS developer

Jan 2022 – Present

Hyderabad, Telangana

Project and achievements:

React Developer

HP Project | Hewlett Packard

- Developed and Maintained Web Application interfaces using React.js, redux, routing (SPA's) and React Hooks.
- Optimized application performance through code-splitting, lazy loading memorization, and call-back hooks. Improved page load times by optimizing images and implementing efficient caching strategies. Reduced load times by 30%, and increased user retention by 20%.
- Designed and developed reusable UI components to streamline development processes and ensure consistency.
- Refactored legacy codebases to implement modern React patterns and best practices.
- Integrated RESTful API endpoints to fetch and display dynamic data.
- Handled state management using Redux and context API for efficient data flow.
- Worked closely with backend developers to deliver high-quality products.
- Participated in daily standups, and sprint planning as part of agile development teams.
- Created and maintained comprehensive documentation for codebases and development processes.

SUMMARY

Passionate and proficient React.js Developer with 2.8 years of experience in building and maintaining high-performance web applications. Adept at utilizing React.js to develop user-friendly interfaces and seamless user experiences. Skilled in JavaScript (ES6+), HTML5, CSS, routing, hooks, context API, redux, TypeScript, and modern front-end tools. Proven ability to work collaboratively in agile environments, translating business requirements into technical solutions.

CERTIFICATIONS

- **Certified in Microsoft Azure Fundamentals** – Demonstrated foundational knowledge of cloud services and how Azure supports business needs.
- **JavaScript Certified (Udemy)** – Gained comprehensive knowledge and hands-on experience with core JavaScript concepts.

PERSONAL PROJECT

Food Ordering Application:

- Designed and developed a food ordering App using React.js features like hooks, context API, reducers, and HTTP requests using Firebase backend.

Weather Forecast Application:

- Developed a responsive weather forecast application that retrieves real-time weather data from an API. Integrated modern Material UI components for an intuitive and visually appealing user interface. Implemented dynamic features such as location-based weather updates, hourly and weekly forecasts, and error handling for seamless user experience across different devices.

TECHNICAL SKILLS

Java technologies: Java J2EE, Spring Boot, Microservices.

UI Technologies: HTML, CSS, JavaScript, TypeScript, React, Redux tool kit, Bootstrap, Material UI.

RDBMS/NoSQL: MySQL, Oracle, MSSQL, MongoDB

Servers: Apache Tomcat.

IDE/Workbench: Eclipse, STS, SQL Developer, Visual Studio code.

Version Tools: GitHub

Web Service Testing Tools: Postman, Insomnia, GraphQL.

Cloud Services: Azure, AWS Cloud Watch

STRENGTHS:

- Quick Learner
- Problem solver
- Leadership
- Team Oriented

EDUCATION

Bachelor Of Technology

(Electrical and Electronics Engineering)

Vaageswari College of Engineering, Karimnagar.

June 2021

ACHIEVEMENTS

- Developed and maintained scalable web applications using React.js

INTERESTS

- End to end Web Application Development
- Exploring New Tech Gadgets
