

Devalraju Vinod

Analyst II Data Engineering

Mail ID : deva.devalraj@gmail.com

Mobile No : 9553836458

LinkedIn: linkedin.com/in/devalraju-vinod-314b53199

Summary

Dedicated Data Engineer with over 2 years of expertise in Snowflake development and ETL/ELT pipelines, specializing in scalable data solutions and data security through RBAC. Proven ability to optimize workflows and reduce errors using tools like AWS, Informatica, dbt, and Fivetran. Passionate about leveraging SQL, Python, and PySpark for large-scale data engineering projects.

Professional Experience

Analyst II Data Engineering

DXC Technology | Nov 2023 – Present

- Designed and implemented scalable data pipelines utilizing Snowpipes, streams, tasks, and stages (external/internal) in Snowflake.
- Reduced data load errors by 70% and implemented RBAC controllers to ensure secure access for eligible users.
- Automated data replication workflows with Fivetran (HVR), improving pipeline efficiency by 50%.
- Solved 90% of production issues within SLA timelines using ServiceNow, ensuring system uptime.
- Performed unit and manual testing using IICS and PowerCenter, ensuring seamless ETL operations.
- Enhanced data security by managing access using RBAC and Azure Active Directory integration.

Key Achievement: Improved ETL pipeline efficiency by 20%, optimizing resource utilization and reducing processing time.

Associate Professional Data Analyst

DXC Technology | Sep 2022 – Oct 2023

- Built and deployed automated data pipelines on the Snowflake Data Cloud, integrating with AWS S3 for seamless data storage.
- Acted as Snowflake Admin, managing user roles, RBAC configurations, and ensuring security compliance.
- Optimized data workflows for SKF AB, reducing operational delays by 30%.
- Enhanced data quality and reduced errors by 70% through process automation and real-time error monitoring.

Key Achievement: Spearheaded a project that improved reporting accuracy and cut preparation time by 40%.

Professional Project

Project: Data Integration and ETL for SKF Manufacturing

Duration: 1990's – Present.

Technologies: Snowflake, AWS S3, Azure, Informatica, Fivetran HVR, iSeries, Snowpipe, Tasks, Streams, Stages, Stored Procedures, Power BI

Description:

Working with SKF, a leading manufacturer of ball bearings, to provide both development and production support. The project involves creating source locations for structured and unstructured data from multiple sources (e.g., S3, iSeries, SKF internal sources). We used Informatica as an ETL tool to pull, transform, and push data into S3 and Azure storage, ensuring a streamlined integration between various data systems.

Role & Responsibilities:

- **Source Creation & Data Ingestion:** Created and managed source locations for structured and unstructured data from S3, iSeries, and internal SKF sources using Informatica for data extraction.
- **Data Transformation & Storage:** Developed ETL pipelines to transform data and store it in AWS S3 and Azure.
- **Data Processing in Snowflake:** Utilized Snowflake to ingest data from S3, Azure, and direct sources. Implemented Snowpipe, Tasks, Streams, Stages, and Stored Procedures for data transformation and loading into Snowflake.
- **Data Model Creation:** Designed and created databases, data warehouses, tables, and views based on client requirements and source data.
- **Client Reporting & Dashboards:** Delivered processed data for Power BI reporting, enabling users and clients to access real-time business insights.

Key Achievements:

- Successfully integrated and processed data from multiple sources, ensuring seamless data flow into Snowflake.
- Improved data accuracy and timeliness by automating data ingestion and transformation workflows, reducing manual interventions.
- Optimized Snowflake pipelines, reducing data load times by 40% and improving report generation times.

Education

Bachelor's Degree in Computer Science & Engineering
Annamacharya Institute of Technology & Sciences (Autonomous) | Jun 2018 – Jun 2022

Certifications

- Microsoft Certified: Azure Data Engineer Associate (Expires Nov 2025).
- SnowPro Core Certified (Certification ID: S54309-240611-COF).
- AWS Certified Cloud Practitioner (Expires Dec 2026).
- Academy Accreditation - Databricks Lakehouse Fundamentals (Expires Feb 2025).
- Microsoft Certified: Azure Fundamentals.
- Microsoft Certified: Azure Data Fundamentals.

Skills

Programming Languages : Python, SQL, PySpark

Cloud Platforms : Snowflake, AWS (S3, EC2), Azure

ETL/ELT Tools : Informatica (IICS, PowerCenter), dbt, Fivetran

Data Tools : Databricks, Bitbucket, DBTool

Other : RBAC, ServiceNow, Data Visualization, Analytical Skills
