OBJECTIVE

Experienced statistics postgraduate proficient in utilizing advanced data analysis tools to extract meaningful insights from complex datasets. Seeking to leverage analytical skills and academic background in a dynamic data analyst role to drive informed decision-making and optimize business processes. Passionate about transforming raw data into actionable intelligence to contribute to organizational success.

WORK EXPERIENCE

Data Analyst

- ABInbev | Bengaluru | July-2024
- As a Data Analyst, I am responsible for manually verifying and checking data accuracy, achieving a consistency rate of 86%, while also performing data entry tasks to ensure smooth and accurate data management.

SKILLS

- Proficient in statistical analysis software such as Python and Basics of R
- Extensive experience with data visualization tools including Power BI
- Strong knowledge of SQL for data extraction, manipulation, and querying
- Proficient in using Excel at advance level.
- Excellent problem-solving abilities and attention to detail
- Effective communication and presentation skills for conveying complex findings to non-technical stakeholders.

PROJECTS

❖ Portfolio Project: Pizza sales Analysis

- Business statement: To analyze key indicators for pizza sales data to gain insights into business performance. Visualize various aspects like trends.
- Led a Pizza Sales Analysis project, utilizing SQL for data querying and Power BI for visualization.
- Cleaned and transformed data using Power BI's DAX, creating dynamic dashboards with KPIs and slicers.
- Identified sales trends, best/worst sellers, and performance metrics across categories and sizes.
- Conducted comparative analysis between SQL and Power BI results for accuracy validation. Tools used: MS SQL and Power bi.

❖ IPL data Analysis:

- Business Statement: TO analyse key indicators for IPL data set to gain insights and visualize data
- Analysed IPL dataset, cleaned and transform data for insights
- Developed Dynamic Dashboards in MS Excel, using diverse charts and pivot table
- Utilized advanced Excel features for in-depth analysis and KPI design.

❖ **E-Commerce sales data Analysis:**

- Business statement: To analyze E- Commerce data to gain insights into business performance. Visualize various aspects like trends to increase profit to the business.
- Analyzed E-Commerce data to enhance business performance and profitability.
- Focused on maximizing profit by uncovering actionable insights from the data.
- Employed Power BI to visualize trends and key insights, utilizing diverse charts.

❖ **Diwali sales Analysis and Student marks Analysis: EDA**

- Business statement: To analyze key indicators for given data set to gain insights and visualize Graphs.
- Tools used: Jupyter note book.

❖ **Health care data set: Papollo Hospital:**

- Business Statement: To analyze Patient, Billing, Bed Occupancy, Diagnosis, Billing vs Insurance, Feedback for Doctor, visualize various aspects like Diagnosis By using Power bi.

CERTIFICATIONS

- Data Science Certification from ExcelR
- Machine Learning with Python from IBM
- Data Science Internship Projects from Ai variant
- Certificate of Participation on Power Bi from Tech Tip 24

EDUCATIONAL QUALIFICATION

- MSc Statistics from Bangalore University in 2022-- Marks CGPA: 6.05
- BSc from Maharani Science College for women in 2019-- Marks CGPA: 7.21
